**Color Flex Kit [299KIT]**

Includes a pipe extension, a drill bit, and a rubber mallet. Those parts are available for individual sale, as well.

**STEP 1.** Install the auger bit (provided in 299KIT) on any supporting drill. Drill a hole in the desired location (approx. 11-12" deep)

**STEP 2.** Place Color Flex marker in hole and complete installation by using the pipe extension and rubber mallet (provided in 299KIT) ensuring the unit pipe is completely below the surface.

**STEP 3.** You are ready to go!
